JAUME TRES *founder | fondatore | zakladatel*

Every invention has its origin
Qualsiasi invenzione ha la sua origine
Každý vynález má svůj původ

The greatest ideas come from the vineyards...

Dai vigneti nascono grandi idee...

Na vinicích se rodí velké ápady...

TRES began operating in 1968 in the Penedès wine-growing region.

The company's foray into the manufacture of tapware started when its founder, Jaume Tres, turned the wine sector upside down with a new tap for casks with improved airtightness.

This new tap prevented wine loss and stopped unnecessary air from entering, thus preventing the wine from foaming when released.

TRES' industrial spirit emerged from its origins creating taps for wine barrels, followed by years of experience inventing and designing products that create the best water experiences.

TRES inizia la sua attività nel 1968 nella zona viticola del Penedès.

Il salto nel mondo della rubinetteria fu fatto quando il fondatore, Jaume Tres, rivoluzionò il settore vinicolo con un nuovo rubinetto per la botte che migliorava la chiusura ermetica.

Il nuovo rubinetto evita la fuoriuscita del vino, l'ingresso dell'aria ed elimina la schiuma.

Lo spirito industriale di TRES nasce dalla creazione dei rubinetti per le botti del vino per dare poi vita a un lungo percorso di creazione e progettualità e alle migliori esperienze con l'acqua.

Společnost TRES zahájila svou činnost v roce 1968 v katalánské vinařské oblasti Penedès.

Průnik firmy do sektoru vodovodních baterií začal v okamžiku, kdy její zakladatel, Jaume Tres, rozpoutal ve vinařském sektoru revoluci. Jeho nové kohoutky na sudy s vínem zlepšovaly hermetické uzavření.

Nový kohoutek eliminuje pěnu při vypouštění vína, zabraňuje úniku vína a nežádoucímu pronikání vzduchu do sudu.

Průmyslový duch společnosti TRES a dlouholetá cesta lemovaná vynálezy a návrhy, které daly vznik těm nejlepším zážitkům se vším, co se týká vody, vyšly z výroby kohoutků na sudy s vínem.

TRES manufactures accessible products in which design and experience are the focal points, all while improving water consumption.

TRES fabbrica prodotti accessibili in cui il design e l'esperienza sono il pilastro fondamentale e favoriscono un consumo responsabile dell'acqua.

TRES wytwarza dostępne produkty, w których filarem są wzornictwo i doświadczenie. Dzięki nim zużycie wody jest bardziej odpowiedzialne.

Designed, created and developed by TRES

Pensato, creato e sviluppato a TRES

Per assicurare la massima sicurezza dei suoi prodotti, TRES controlla l'intero processo di fabbricazione, dal concepimento dell'idea al risultato finale.

Lo spirito di TRES è presente in ogni rubinetto, dalla cura dell'estetica alle innovazioni tecnologiche applicate, e offre un prodotto unico, attuale e funzionale con numerose soluzioni per tutte le persone che cercano il comfort.

Aby společnost TRES zajistila tu nejvyšší kvalitu svých výrobků, kontroluje celý výrobní proces ve svém závodě, od konceptu nápadu až po jeho realizaci.

Duch společnosti TRES se prolíná každou vodovodní baterii, odráží se v jejím designu, zdokonaluje technologii, a nabízí tak jedinečný, aktuální a funkční produkt se širokou škálou řešení pro všechny, kteří hledají pohodlí.

With endless possible combinations, based on rounded or square designs for showers and bathtubs, TRES has become an expert in the manufacture of shower units that add distinction to the bathroom and enable users to spend enjoyable relaxing moments beneath the shower. With quality finishes and multiple functions to make showering or bathing the favorite time of day.

Con infinite combinazioni possibili, seguendo design tondeggianti o squadrati, sia per la doccia che per la vasca da bagno, TRES si è specializzata nella fabbricazione di gruppi doccia che conferiscono personalità al bagno e offrono grandi momenti di relax nell'acqua. Con finiture di qualità e molteplici funzioni per rendere la doccia o il bagno il momento preferito della giornata.

Díky nespočtu možných kombinací, kulatým i hranatým tvarům jak sprch, tak i van, se společnost TRES stala specialistou na výrobu sprchových souprav, které koupelnám dodávají na příznivém vzhledu a umožňují relaxaci s vodou. S kvalitním provedením a velkým množstvím funkcí učiní ze sprchování příjemný každodenní zážitek.

Touch-cool ®

The internal water circuit makes the cold water come in contact with the surface, meaning the tap stays cool when touched and preventing burns.

Il circuito interno dell'acqua fa in modo che sia l'acqua fredda a toccare la superficie e in questo modo il rubinetto rimane sempre freddo al tatto, evitando bruciature.

Vnitřní oběh vody způsobí kontakt mezi studenou vodou a povrchem, díky čemuž zůstává baterie vždy chladná na dotek a nedochází k popálení.

Easy-clean ®

TRES offers the possibility of cleaning the cartridge easily in the event of blockage, without losing its calibration.

TRES offre la possibilità di pulire facilmente la cartuccia in caso di ingorgo senza perderne la calibratura.

V případě zanesení nabízí TRES možnost jednoduchého čištění kartuše bez ztráty kalibrace.

Tres Instant 77 ®
Tres Instant 57 ®

The cartridge ensures a constant flow of water at the desired temperature ± 1 degree, in spite of pressure and/or temperature changes. Designed for Legionella disinfection.

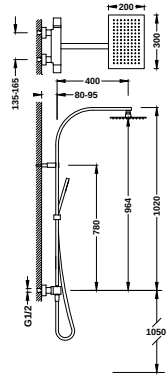

La cartuccia assicura una portata d'acqua costante alla temperatura desiderata di ± 1 grado in caso di variazioni di pressione e/o temperatura. Concepita per la disinfezione dalla legionella.

Kartuš zaručuje stálý průtok vody zvolené teploty, ± 1 stupeň, v závislosti na změně tlaku a/nebo teploty. Vhodné k dezinfekci legionely.

Design compatto
Kompaktní konstrukce

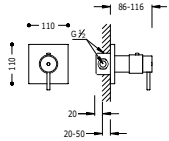

The advantages of concealed thermostatic tapware, in the minimum space. The Compact thermostatic equipment by TRES is optimum both for plasterboard and solid wall constructions. All that is needed is 50 mm depth, at most, to embed the product in the wall. There are no screws in sight, reinforcing its pure, clean lines. With a safety button that limits the temperature to 38°C, and an inverter to regulate the water outlet.

I vantaggi di una rubinetteria termostatica a incasso in uno spazio ridotto. I rubinetti termostatici Compact di TRES sono l'ideale da montare su pareti sia in cartongesso sia in muratura. È necessario soltanto un massimo di 50 mm di profondità per incassare il prodotto nel muro. Viti non visibili e linee essenziali e semplici. Con pulsante di sicurezza che riduce la temperatura a 38°C e inverter per azionare l'uscita dell'acqua.

Výhody podomítkové termostatické baterie s minimálními požadavky na prostor. Termostatické baterie Compact od TRES představují optimální řešení pro montáž do sádrokartonu i do zděných stěn. Potřebná hloubka k vestavění produktu je maximálně 50 mm. Nepřítomnost viditelných hlav šroubů znovu umocňuje minimalistickou čistotu linií. Bezpečnostní tlačítko se stará o omezení maximální teploty na 38°C, k nastavení výstupu vody jsou produkty vybaveny měničem.

The lever is located at the exact point where the water comes out, eliminating contact between the water and the air and preventing contamination.

La chiusura è situata esattamente all'uscita dell'acqua, eliminando il contatto tra essa e l'aria ed evitando in questo modo la sua contaminazione.

Uzávěr je umístěn přímo u výstupu vody, čímž je zamezeno kontaktu vody se vzduchem a tím pádem její kontaminace.

Replaces the bidet and makes good use of space
Sostituite il bidet e approfittate dello spazio
Nahraďte bidet a využijte prostoru

Replaces the traditional bidet with a tap that takes advantage of the toilet bowl. Simple to install, and does not occupy any space. You can opt for an embedded mixer tap with integrated shower/bidet support, or else use the wash basin tap with a specific outlet for the shower-bidet. Two options to adapt to new spaces and bring your bathroom up to date.

Sostituisci il bidet tradizionale con un rubinetto da incorporare nel water. L'installazione è semplice e non occupa spazio. Si può scegliere un rubinetto monocomando incassato con supporto per doccia/bidet incorporato o utilizzare il rubinetto del lavandino con apposita uscita per la doccia/bidet. Due opzioni da adattare ai nuovi spazi per riformulare l'arredo bagno.

Vyměňte tradiční bidet za ruční bidetovou spršku využívající WC nádržku. Instalace je snadná a zařízení nezabírá místo. Existují dvě řešení: jednopákové podomítkové řešení s integrovaným držákem bidetové spršky nebo umyvadlová baterie se zvláštním výstupem pro bidetovou spršku. Dvě možnosti, jak se přizpůsobit novému prostředí a zmodernizovat toaletu.

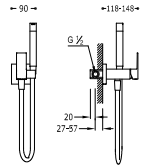

1. **Built-in mixer tap with integrated shower-bidet support.** / Monocomando miscelatore incassato con supporto doccia-bidet integrato. / *Vestavěná jednopáková směšovací baterie s integrovaným držákem sprchy-bidetu.*

Recommended installation
Installazione consigliata
Doporučená instalace

Shower drains
A shower may be equipped with two water outlets, as long as the drain has been designed to permit this (We recommend drain: Nr. 104840).

Scarichi doccia
Nella doccia sarà possibile utilizzare contemporaneamente due uscite dell'acqua, a condizione che lo scarico sia stato progettato allo scopo. (Si raccomanda l'uso dello scarico Ref.: 104840).

Sprchové odtoky
Ve sprše bude možné použít dva výstupy vody zároveň, avšak pokud je k tomu odtok správně nadimenzován. (Doporučujeme odtok kód: 104840)

Water supply
Different products have different pressure and flow requirements, but a dynamic pressure of between 2 and 3 bar should be sufficient. Dynamic pressure is measured with the tap turned on.

Fornitura dell'acqua
Ogni prodotto richiede una pressione diversa a seconda del flusso, sebbene sia sufficiente una pressione dinamica compresa tra 2 e 3 bar. La pressione dinamica viene misurata con il rubinetto aperto.

Dodávka vody
Různé výrobky potřebují různý tlak s rozdílným průtokem, dynamický tlak mezi 2 až 3 bary však postačí. Tento dynamický tlak se měří s otevřeným kohoutkem.

Built-in taps
The great advantage of these built-in products is the extra space they provide in small showers. They are also much easier to clean.

Rubinetteria incassata
Questi prodotti incassati offrono l'enorme vantaggio di occupare meno spazio nelle docce piccole e di essere più facili da pulire.

Vestavěné baterie
Vestavěné baterie mají velkou výhodu v tom, že šetří prostor v malých sprchách a snadněji se čistí.
